

HERE'S WHAT OUR CUSTOMERS ARE SAYING ABOUT iMARC:

"I have found the iMARC engraving system to be truly a lifesaver. We sell tags to all of our adoptive homes and we have been able to return many lost pets to their homes."

Linda Willman, Lakeshore Humane Society (Manitowoc, WI)

"(The) iMARC tag engraver is a great tool to increase customer traffic, and watch your collar business grow with every tag sold."

Jeff Saathoff, Sundance Feed & Seed (Grand Island, NE)

"Very impressed with the new iMARC engraving system. Sold 104 tags in the first 3 1/2 weeks. Well worth the investment."

Mark Gray, Elliot's For Pets (Riverside, CA)

"The iMARC machine is very easy to use and fun too! Our customers really appreciate the convenience of one-stop shop. We offer engraving on the back of our rabies tags for a small fee and this is real popular at our clinic. This machine is so easy to use with step-by-step prompts—we love it!!!"

Sherie R. Butler, Teller-Park Vet (Divide, CO)

"Very user friendly, all the sales staff can operate the machine. Great and easy add-on at the time of check-out, wish we did this years ago."

Stan Kolbus, S & W Feed & Supply (Carson City, NV)

"I didn't realize that making and selling custom engraved pet tags would be so easy."

Carney Walden, Southside Farm Supply (Plant City, FL)

"This tag machine is great. All of my employees love to use it—very simple to operate. Our employees actually recommend this to all of our customers without being told to so they can use the machine. Our tag sales are up 95%!"

Pamela Dyer, Active Pets (Knoxville, TN)

"We used to send our tags out to be made and ran into problems with clients never receiving them so we purchased your machine. Not only was it fast and easy but our tag sales tripled in just a month."

Monica Leighton, Jacaranda Animal Hospital (Verio, FL)

"The iMARC tags have been a great P.O.S. item. We used to have to send away for tags. Many customers don't want to wait for their tags to be mailed back to them, they want them now. The iMARC tags have given us a better way to satisfy our customers' needs."

Jennifer Bowman, Complete Petmart #32 (Ft. Wright, KY)

"The flexibility, variety, and ease-of-use of the iMARC machine has increased our tag sales by 20% over the previous machine where the customer made their own tags. Highly recommended."

Don Hayes, Pets Inc (Tempe, AZ)

"Before we had our iMARC tag machine, our customers had to wait up to four weeks to receive their pet tags. Now, we can offer them high quality double-sided tags in only minutes. That's what I call customer service."

Denny Avon, Complete Petmart #25 (Reynoldsburg, OH)

"THE iMARC SYSTEM IS SO EASY TO USE AND THE SALES ARE HIGHER THAN EXPECTED; IT WON'T TAKE LONG TO PAY FOR THE MACHINES AND THEN ALL PROFITS (ARE OURS)."

Shawna Smallwood, Feed Coral, Inc. (Newport, OR)

"Our veterinary clinic engraves a combination rabies tag and personal ID tag for all dogs vaccinated for rabies. Our clients are very pleased with the personalized rabies tag, our clinic staff appreciates not needing to look up tag numbers on lost dogs, and the tags provide a nice revenue source."

John T. Haugo, DVM, Haugo Vet Clinic (Litchfield, MN)

"The iMARC engraving machine has been a great asset to our store. Our customers enjoy the convenience of getting their tags while they wait rather than waiting to get them in the mail. Our tag sales have more than tripled since we purchased the machine."

Tim Eplion, Complete Petmart #90 (Huntington, WV)

"Best investment I ever made for my business—my tag sales quadrupled!"

Bill Trufant, B&B Pet Stop (Mobile, AL)
