

ASSEMBLY INSTRUCTIONS

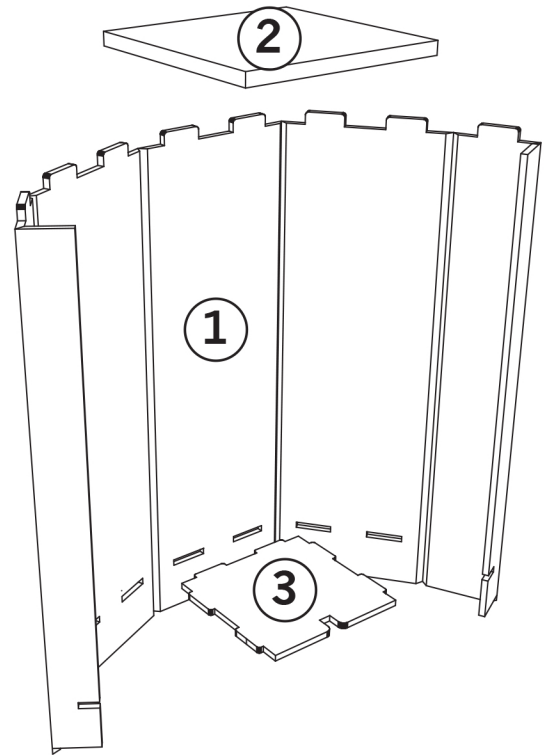

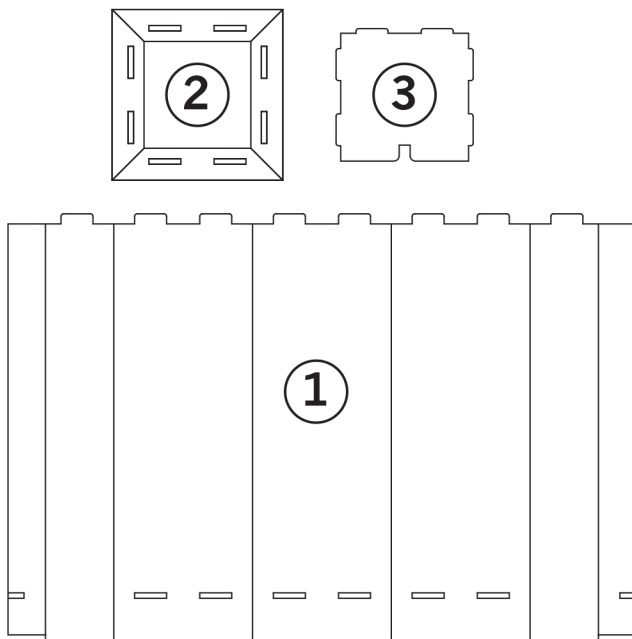

iMARC PEDESTAL

Dimensions	16" (W) x 16" (D) x 40" (H)
Material	FALCONBOARD® 1/2"

PACKAGE CONTENT VISUALIZATION

PART	QTY.	SIZE
①	1	16" x 16"
②	1	59" x 40"
③	1	13" x 12.5"

ASSEMBLY TIPS

- Start building the structure where the final position will be.
- Lay down on the floor all elements before building and organize them using the image above as a reference. Unfold panels as needed.
- All panels and connectors have a reference sticker in the none visible area for easy identification.
- Always start building one corner first (panels making a 90 degree) so the structure can stand by itself.
- You can insert or slide the panel to the connector from the side. Just make sure that the panel is perfectly aligned with the connector.
- Always slide top connectors first, (if applies). Top connectors should surpass folding line to lock panels in a straight position.
- While putting the panels and connectors together, always make sure that panels are all the way inside the connectors for a tight fit.
- In some cases, it is advisable to use a small rubber hammer to secure the connectors with the panels.
- Some designs will require to secure the panels using 2" self-drilling screws (included). A standard Philips screwdriver is required.
- If the structure of cardboard will be re-used, handle with care while tear down and repacking.
- Keep the original box and make sure is packed the same way as it was received.
