## iMARC Touch Engraving Instructions

| | |
|---|---|
| Step 1: | Power the machine on.  The switch is in the front of the machine. |
| Step 2: | Wait for the machine to power on and show the iMARC logo.  The dog will be walking across the screen. |
| Step 3: | Press anywhere on the touch screen to continue. |
| Step 4: | Select the up and down arrows on the screen to select the tag to be engraved. |
| Step 5: | Press the green arrow to continue. |
| Step 6: | Select the font to be engraved by pressing on it. |
| Step 7a: | Enter the text to be engraved on the touch keyboard screen. |
| Step 7b: | To engrave a signature or freehand draw, select the signature icon.  This will open the Signature box.  Draw with your finger what you would like to engrave and press the green arrow to continue.  |
| Step 7c: | To enter text from a smartphone, scan the QR code shown on the text entry screen.  This will open a web page.  Enter the text on the smartphone and select the Generate button.  A QR code will appear.  Hold the QR code under the bar code reader on the left side of the machine.  The text will now appear on the iMARC Touch screen. |
| Step 8: | Select the green arrow to continue. |
| Step 9: | Confirm the text is correct and insert the item as shown on the touch screen. |
| Step 10: | Press the green arrow to continue. |
| Step 11: | The tag will now engrave. |
| Step 12: | Remove tag from the machine when finished. |
| Step 13: | Select the engrave new item button to engrave a new item or press the home button to finish. |
